

WHISPERSTRIKE

PRECISION SILENCE

LIFESAVER 22 (.22 CAL)

5.56 rated and you can clean it!

LIFESAVER 22: Lightweight. Accurate. Fully Serviceable.

The **Lifesaver 22** is light enough for 22LR and tough enough for 22 Creedmoor. ***One suppressor to rule them all!*** It delivers exceptional suppression, repeatable accuracy, and uncompromising durability, with a fully serviceable 3D-printed monocoire that ensures easy maintenance and long-term reliability.

Engineered for Quiet Performance

The Lifesaver 22 uses advanced gas-flow design to strip, cool, and slow escaping gases for remarkably quiet shooting with minimal backpressure. The result: smooth cycling, cleaner operation, and a noticeable improvement in accuracy.

Serviceable 3D-Printed Monocoire

The Lifesaver 22 is the first 3D-printed titanium monocoire suppressor in its class that is **fully serviceable**. The monolithic baffle threads directly to the barrel for perfect alignment, while the titanium tube floats concentrically around the core for consistent precision. Full-auto rated and strong enough to handle everything from .22LR to 5.56.

Accuracy You Can Feel

Our Symmetrical Gas Distribution Technology delivers consistent gas flow throughout the core and removes the inconsistencies that cause POI shift. Expect tight groups shot after shot, even during high-volume sessions.

Titanium Strength, Easy Maintenance

Made from lightweight, corrosion-resistant Ti64V ELI Grade 23 titanium, the Lifesaver 22 is built for a lifetime of shooting. The serviceable core and included tools make cleaning fast and straightforward, even after heavy use.

Why Choose the Lifesaver 22?

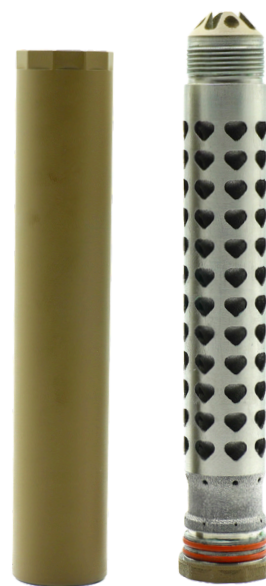

- Ultra-Quiet: Outstanding sound reduction with minimal backpressure.
- Serviceable: Fully disassembles for easy cleaning.
- Titanium Tough: Lightweight, corrosion-resistant construction.
- Versatile: Full-auto rated; compatible with .22LR through 5.56.
- Accurate: Symmetrical design for consistent point of impact.

The Lifesaver 22 redefines suppressors with unmatched silence, accuracy, and durability. Elevate your shooting with the Whisperstrike Lifesaver 22.

Available in the following colors: **Black, FDE, OD Green & Tungsten.**

Lifesaver - Flat Dark Earth

3D-Printed Titanium Monocoire

Rated as follows:

- 22LR Belt Fed: 200 rounds before cooling
- 17HMR: 60 rounds before cooling
- 5.7x28mm: 45 rounds before cooling
- 5.56 / 16"+ (no SBR) 30 rounds before cooling
- 22-250: 6 rounds before cooling
- 22 Creedmoor: 4 rounds before cooling

- Construction: Titanium
- Finish: Cerakote C-Series
- Length: 6"
- Diameter: 1"
- Weight: 5.44oz
- Attachments: 1/2x28 Direct Thread
- Sound Reduction: Up to 30dB
