

## TROPHY 556 (5.56MM)

### Trophy 556: Lightweight Precision for Modern Rifles.

The **Whisperstrike Trophy 556** is built for shooters who prioritize accuracy, balance, and dependable performance in a 5.56 suppressor. Designed as a lightweight, direct-thread system, it keeps your rifle simple, streamlined, and easy to run. Its advanced internal architecture manages gas flow to reduce blast, soften recoil impulse, and maintain consistent shot behavior. Whether on the range or in the field, it delivers smooth, repeatable performance you can trust.

### Stay On Target, Every Time

The Trophy 556 is engineered to maintain consistent point of impact through both slow fire and rapid strings. Its perfectly symmetrical baffle design minimizes shift, and when coupled with its extremely lightweight construction, delivers POI shift performance that closely mirrors shooting unsuppressed. It outperforms typical suppressor designs. Controlled gas flow helps keep the rifle stable and easy to track, while follow-up shots stay fast and predictable, giving shooters confidence with every trigger press.

### Engineered for a Better Sound Signature

The Trophy 556 delivers strong sound reduction for 5.56 platforms, helping tame sharp report and improve overall shooting comfort. Its efficient gas management system smooths out tone and reduces harsh blast, creating a more controlled and refined shooting experience. Whether training or shooting recreationally, it makes time behind the rifle more enjoyable.

### Lightweight Strength. Full-Auto Ready.

Constructed from 3D-printed titanium with a one-piece internal structure, the Trophy 556 is designed to handle heat and sustained use without adding unnecessary weight. It remains reliable under repeated firing while keeping your rifle balanced and responsive. Built for real-world conditions, it delivers durability without compromise.

### Modern Materials. Relentless Durability.

Built from Ti64V ELI Grade 23 titanium, the Trophy 556 offers long-term strength with excellent heat resistance. This higher-purity titanium, compared to more common grades used in many suppressors, provides enhanced consistency and durability under demanding conditions. Its one-piece 3D-printed construction provides the internal volume needed for efficient gas control, resulting in stable, consistent performance across a wide range of shooting conditions. Minor sparking may occur during initial use, which is normal for 3D-printed titanium suppressors.

### Dialed In for AR-15 Performance

At 7 inches in length and weighing 8.2 ounces, the Trophy 556 keeps rifles lightweight, fast, and well-balanced. Its compact profile minimizes added length while maintaining strong performance, making it ideal for AR-15 platforms and other 5.56 rifles. The result is a suppressor that enhances performance without slowing you down.

### Why Choose the Trophy 556?

- **Accurate:** Consistent point of impact with minimal POI shift, even during rapid fire.
- **Lightweight:** Designed to keep rifles fast, balanced, and easy to handle.
- **Durable:** 3D-printed Grade 23 titanium for long-term strength and heat resistance.
- **Quiet:** Effective sound reduction with a smoother, more controlled tone.
- **Cleaner Shooting:** Reduced blast and optimized gas flow for improved shooting comfort.
- **Rifle Optimized:** Purpose-built for 5.56 platforms and real-world use.
- **Compact:** Short overall length for improved maneuverability.
- **Simple Mounting:** Direct thread design for secure attachment.

Available in the following colors: **Black, Burnt Bronze, FDE, OD Green & Tungsten.**

**Trophy 556 - Burnt Bronze**

**7" Length. 1.5" Diameter.  
Sized for Performance.**

**1/2x28 Direct Thread**

Calibers: 5.56, 22-250, 22 Creedmoor  
 Construction: Titanium  
 Finish: Cerakote C-series  
 Diameter: 1.5  
 Length: 7"  
 Weight: 8.2oz  
 Attachments: 1/2x28 Direct Thread  
 Full-Auto Rated: Yes  
 Sound Reduction: Up to 30dB
