PRECISION SILENCE

TROPHY 30 (30 CAL)

Trophy 30: Lightweight Performance for .30 Cal Platforms

The **Whisperstrike Trophy 30** was engineered for shooters who want lightweight handling, reliable performance, and precision from a .30 caliber suppressor. Its direct-thread design keeps weight down while providing a simple, rock-solid mounting system. Internally, the suppressor is optimized for efficient gas control to reduce muzzle blast, soften recoil impulse, and maintain consistent shot-to-shot performance across multiple rifle platforms. From hunting setups to precision rifles and hard-use carbines, the Trophy 30 delivers balanced suppression without unnecessary bulk.

Precision You Can Feel

The Trophy 30 is designed to maintain a consistent point of impact from the first shot to the last. Its symmetrical baffle geometry and lightweight design help minimize shift versus shooting unsuppressed while keeping the rifle balanced and controllable. Efficient gas flow reduces unwanted movement and helps shooters stay on target during both deliberate fire and rapid follow-up shots.

Smooth Sound. Serious Suppression.

The Trophy 30 delivers impressive sound reduction across a wide range of .30 caliber platforms, including excellent performance with subsonic .300 Blackout ammunition. Its advanced internal geometry softens harsh report, reduces sharp muzzle blast, and creates a deeper, more controlled tone for a smoother shooting experience.

Lightweight Handling. Full-Auto Durability.

Constructed from advanced titanium with a fully integrated one-piece design, the Trophy 30 combines lightweight handling with serious durability. Full-auto rated and engineered for demanding conditions, it remains balanced and responsive without sacrificing strength or reliability.

Advanced Titanium. Proven Durability.

Crafted from Ti64V ELI Grade 23 titanium, the Trophy 30 offers exceptional strength, heat resistance, and long-term reliability. Its advanced internal structure maximizes volume for efficient gas flow and consistent suppression performance across a broad range of calibers and firing conditions. Minor sparking during initial use is normal for titanium suppressors and will diminish over time.

Balanced for Modern Rifle Platforms

With its streamlined profile and lightweight construction, the Trophy 30 keeps rifles agile, responsive, and easy to handle. Its slim diameter pairs naturally with AR-style rifles, bolt guns, and other modern platforms without adding unnecessary bulk, preserving the rifle's natural balance and handling characteristics.

Why Choose the Trophy 30?

- **Accurate:** Consistent point of impact with minimal POI shift for confident shooting.
- **Lightweight:** Keeps rifles balanced, responsive, and easy to maneuver.
- **Durable:** Grade 23 titanium construction built for heat and long-term use.
- **Quiet:** Excellent sound reduction with a deep, controlled tone.
- **Subsonic Ready:** Outstanding performance with subsonic .300 Blackout ammo.
- **Full-Auto Rated:** Engineered for demanding firing schedules and hard use.
- **Versatile:** Designed for AR platforms, bolt guns, and modern .30 caliber rifles.
- **Simple Mounting:** Direct thread attachment for a secure, streamlined setup.

Available in the following colors: **Black, Burnt Bronze, FDE, OD Green & Tungsten.**

Trophy 30 - OD Green

7" Length. 1.5" Diameter.
Compact Profile. Big Performance.

5/8x24 Direct Thread

Calibers: 300 Blackout, 300 Win Mag, .308, 7.62x39mm, 6.5 Creedmor
Construction: Titanium
Finish: Cerakote C-series
Diameter: 1.5"
Length: 7"
Weight: 8.2oz
Attachments: 5/8x24 Direct Thread
Full-Auto Rated: Yes
Sound Reduction: Up to 30dB
